| Unit Number | Unit Name | Year 8 Topics Covered |
| :---: | :---: | :---: |
| 1 | Powers of 10 | Place value and powers of 10 Convert between ordinary and standard form Calculations with standard form |
| 2 | Calculations and Accuracy | Convert from one metric unit to another Imperial and metric unit conversion <br> Round to a given number of significant figures Estimate answers to calculations (no powers/roots) <br> Find upper and lower bounds Inequality notation for bounds |
| 3 | Using and Interpreting Data | Find the mean, median, mode and range for a set of numbers Calculate averages from a frequency table Estimate the mean from a grouped frequency table |
| 4 | Sequences and Linear Graphing | Find the nth term of arithmetic sequences <br> Recognise and use Fibonacci style sequences <br> Understand the difference between arithmetic and geometric sequences <br> Conversion graphs <br> Use co-ordinates in all four quadrants <br> Find the midpoint of a line <br> Complete a table of values and draw graphs of the form $y=m x+c$ <br> Use $y=m x+c$ to find the gradient and intercepts of a line Calculate the gradient of a line |
| 5 | Transformations | Line and rotational symmetry Reflect shapes in the axes of a graph <br> Reflect shapes in lines such as $x=2$ and $y=-3$ <br> Reflect objects in the lines $\mathrm{y}=\mathrm{x}$ and $\mathrm{y}=-\mathrm{x}$ <br> Rotate shapes about any point <br> Translate a shape by a vector <br> Enlarge a shape by a positive scale factor (including fractional) |
| 6 | Quadratics | Expanding double brackets <br> Factorise double brackets <br> DOTS <br> Single or double bracket factorisation |
| 7 | Pythagoras | Use Pythagoras' Theorem to calculate the hypotenuse <br> Use Pythagoras' Theorem to calculate shorter lengths <br> Use Pythagoras' Theorem to calculate the distance between co-ordinates |

\(\left.$$
\begin{array}{|c|c|c|}\hline & & \begin{array}{c}\text { Properties of triangles } \\
\text { Properties of quadrilaterals }\end{array} \\
8 & \begin{array}{c}\text { Special } \\
\text { Quadrilaterals } \\
\text { and Polygons } \\
\text { Calculate the area and perimeter of triangles }\end{array} \\
\text { Calculate the area and perimeter of compound shapes } \\
\text { Properties of trapezia, parallelograms, rhombus, and kites (including } \\
\text { angles) }\end{array}
$$ \quad \begin{array}{c}Calculate the area and perimeter of parallelograms \\
Calculate the area and perimeter of trapezia \\
Calculate the area and perimeter of compound shapes \\
Calculate interior and exterior angles in regular polygons \\

Tessellations\end{array}\right]\)| Angles in parallel lines |
